## IMPLANT SYSTEMS

MIS proudly offers an extensive range of implant systems, providing simple solutions for a wide variety of clinical scenarios, from basic to complex. Our implants are the outcome of an exceptionally high-level R&D process resulting in implant systems that are simple, yet offer enhanced functionality and performance features. MIS implants are made of biocompatible, medical grade titanium alloy, with a surface of the highest quality. They are treated by both sand-blasting and acid-etching, to promote extraordinary cleanliness and facilitate long-lasting osseointegration.

## Drill Stoppers Kit, Standard Platform

Following the use of MIS length-based pilot drills, the C1 Standard Platform Stoppers Kit ensures drilling to the exact desired depth. The kit includes the most commonly used implant lengths: 8, 10, 11.5 and 13mm. Drill Stoppers Kits are suitable for both V3 and C1 conical connection implant systems.

## Crown Set

The MIS Crown Set is a delivery system comprised of an auto-mix, easy-to-use dispensing syringe and disposable dispensing tips. The resin-based cement combines high retention properties along with the ability to remove a restoration if needed. The cement sets within 120 -150 seconds and allows easy removal of excess material. Note: Abutments should be sand-blasted prior to cementation to achieve maximum retention.

## PROSTHETIC OPTIONS

MIS offers a comprehensive range of prosthetic systems, which are suitable for any indication and procedure type, including analog and digital workflows. Combined with a wide variety of supporting tools and digital solutions, our products are designed to provide the biological advantages that are critical for successful treatment.

MIS superstructures are designed to meet all prosthetic needs and fit all accepted working methods. Abutments are available in a wide range of heights, gingival collar heights, angles and margin types, as well as a line of concave emergence profile abutments which are designed to facilitate soft tissue management and growth. MIS offers solutions for both screw retained and cement retained treatments, for temporary and permanent restorations.
