Isolates the operative area, whether it's a single tooth or the entire dental arch and prevents contamination and swallowing of instruments in the oral cavity. Its contrasting colors offer an ample field of vision.

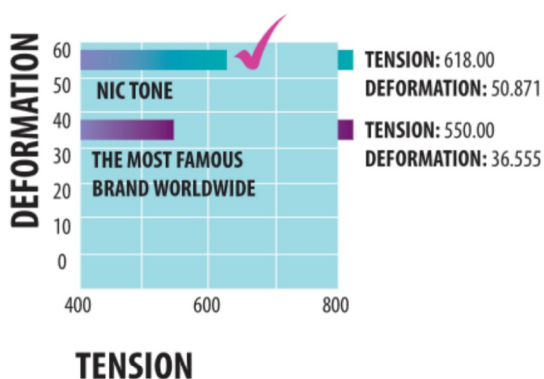

Nic Tone Professional Dental Dam

- Colors contrasts with oral tissue
- Positive influence on concentration capacity
- Adjusts to soft tissue retraction
- Better expansion and resistance
- Made with refined Latex
- Stretches up to 800% its size without tearing.
- Low protein and powder levels
