OUR RANGE OF INSTRUMENTS FOR A COMPLETE AND EFFICIENT DIAGNOSIS

“The ultimate goal of dental care is to facilitate the lifelong maintenance of every patient’s oral health. It all starts with a reliable diagnosis that is clearly and effectively communicated to the patient.

For this reason, we have designed diagnostic instruments in materials and shapes that offer the ideal trade-off between precision, elasticity, ergonomics and durability, with different emphasis depending on the scope of the instrument.”

COTTON AND DRESSING PLIERS

0600-2

Antimagnetic and easy to clean, these pliers are light enough to ensure comfort and durable enough to ensure long-term effectiveness.

Their different shapes and angles make them ideal for any situation. The tip has a coating which will not stick to filling materials, making it a versatile instrument for positioning them inside the cavity.

SINGLE-ENDED EXPLORERS

0700-23

Sharp and pointed explorers, perfect to detect even the smallest cavity. They offer the perfect balance between elasticity and rigidity.

Thanks to the thin tip and controlled flexibility, they are extremely useful to detecting fissures and oversize fillings, as well as confirming of optimal occlusion in fixed dental prosthetics.

S0690-2

How to use the Ultralight Mirror and the Ultralight Retractor:

- insert 2 alkaline batteries
- remove the batteries prior to sterilization
- sterilizable O-ring on the light to stop saliva or liquid from getting into the handle, thus preserving battery life
- easy on/off through the bottom cap that works as a switch
- no maintenance required for electrical or mechanical parts
- full disassembly for proper cleaning
- easy battery and light bulb replacement
- ergonomic handle
