Product / REF

SONICflex scaler tips

Basic UDI-DI

++EKAVG503Z7

Classification

Class IIa, Rule 9

Intended use of the product (s)

This medical device is:

- Intended for dental treatment only. All other types of use or modifications of the product are not permitted and can be hazardous.

SONICflex scaler:

The SONICflex scaler tips are used in combination with the SONICflex for prophylaxis, removal of sub- and supragingival calculus, and in conservative dentistry.

SONICflex cariex:

The SONICflex cariex tips are used in combination with the SONICflex for the excavation of caries.

SONICflex seal:

The SONICflex seal tip is designed for use in combination with the SONICflex for exposing and expanding fissures before sealing.

SONICflex micro and bevel:

The SONICflex micro and bevel tips are used in combination with the SONICflex for preparing and chamfering minute lesions relating to defects while preserving neighbouring teeth.

SONICflex paro:

SONICflex paro tips are used in combination with the SONICflex to remove periodontal plaque.

SONICflex endo:

The SONICflex endo set is used in combination with the SONICflex for orthograde preparation of the pulp cavity and of the upper third of the root canal.

SONICflex rootplaner:

The SONICflex rootplaner tips are used in conjunction with the SONICflex for root canal preparation.

SONICflex retro:

The SONICflex retro tips are used in conjunction with the SONICflex for retrograde root canal preparation.

SONICflex endo clean:

The SONICflex endo clean needles can be used in connection with the SONICflex for sonic-activated cleaning of the prepared root canal.

SONICflex clean:

The SONICflex clean brush set can be used in combination with the SONICflex instrument for professional tooth cleaning, removal of stains and discolouration, as well as for dental polishing. An additional use of the system, is preoperative cleaning of fissures, cavities and crown preparations.

SONICflex prep ceram and prep CAD/CAM:

The SONICflex prep ceram and prep CAD/CAM tips are used in combination, with the SONICflex for finishing preparation of proximal cavity edges for laboratory and chairside fabricated ceramic inlays.

SONICflex prep gold:

The SONICflex prep gold tips are used in combination with the SONICflex for finishing preparation of proximal cavity edges for laboratory fabricated gold inlays.

EC Declaration of Conformity
according to Annex IV
Medical Device Regulation 2017/745/EU

SONICflex cem:

The SONICflex cem tip is used in combination with the SONICflex to vibrate inlays/ onlays.

SONICflex implant:

The SONICflex implant set is used in conjunction with the SONICflex for subgingival and supragingival removal of soft stains on dental implants and abutments.

SONICflex prep crown:

The SONICflex prep crown tips are used in combination with the SONICflex for the finishing work on crown edges in crown preparation.
